### Stow Away

Tameka Jo Pauldo, Staff Writer

In-town living has its upside: quick access to the city night life and a short commute to work. But there can also be a downside to your 500-square-foot abode: storage.

Whether you live in an apartment, condo or other urban digs, space is the challenge many people face. If you have clothes falling out of your closet and CD's stacked to the ceiling, be creative this fall and de-clutter your space with some of these storage solutions:

**Contain Your Stuff:** The Container Store is known as the original storage and organization store. Store and protect everything from sweaters to shoes in their unique selection of storage boxes. Let the organization experts help you put a lid on it.

**Hang it Up:** The Closet Factory specializes in building customized solutions for every storage need. They not only fit your closet space and personal wardrobe, they appeal to your personal style as well.

**Virtual Vault:** Garde Robe is a premier seasonal wardrobe storage and organization service. This posh full-service storage facility provides first-class storage, online closets, and an array of services. View your professionally photographed and catalogued Cyber Closet from anywhere 24/7. Talk about endless closet space.

**Digital Shuffle:** Music Shifter is the most popular way to store your CD collection. Shift your music into digital format so you never have to ramble through CD's at home or in your car. They offer fast, professional CD conversion and provide packaging and shipping services. Enjoy the freedom of having a digital music library.
